

The Hooverette

This booklet is designed to give you guidance on the ways to get the best possible use from your new cleaner. It is light and easy to use for cleaning floors, carpets, rugs, curtains and upholstery. It is handy for the car too.

Your 'Hooverette' is complete with the accessories necessary for use as either a floor cleaner or a hand cleaner. A clip on buffing pad is even included to brighten up your polished floors. All the latest features for suction cleaner design are incorporated, giving you high suction with convenience in use. For hygienic emptying, your cleaner is fitted with a Hoover Paper 'Disposal' Bag.

All cleaning tools and tubes assemble to the cleaner and to each other by inserting one into the other until locked by the latch. To detach, press on the latch and pull apart.

IMPORTANT

The 'Hooverette' operates on either alternating or direct current, but be sure that your electricity supply voltage is in the range marked on the nameplate, situated on the underside of the Cleaner. Your Hooverette conforms to the requirements of British Standards Specification 1645 (1957) and is radio and television suppressed to British Standards Specification 800 (1954).

for carpets & floors

Fit the carpet and floor nozzle into the front end of the cleaner. Fit the handle grip section into the extension tube and attach to the rear end of the cleaner. The cleaner is then ready for use.

carpet and floor nozzle

The carpet and floor nozzle has been designed for efficient cleaning of both carpets and hard surface floors. The nozzle is fitted with a brush at the back which can either be 'locked' or left in the 'floating' position. These positions are operated by the lever on the nozzle marked '1' and '2'. For normal cleaning on all surfaces keep the brush in its 'floating' position, i.e., with the lever marked '1' pressed forward.

For the removal of clinging cottons, dog hairs, etc., from carpets and stubborn dirt on hard surface floors, tilt the cleaner forward as illustrated and press the lever marked '2'. This will lock the brush in the down position and give a stronger brushing action.

buffing pad

This useful accessory can be used in conjunction with the carpet and floor nozzle for dusting and brightening polished surrounds, lino etc. To assemble, first ensure that the brush on the carpet and floor nozzle is in the 'floating' position by depressing the lever marked 'F'. Then simply clip the buffing pad into position by placing the spring clips between the brush and the metal centre bar of the nozzle. Then press firmly together as shown in illustration.

A black and white illustration of a woman in a light-colored dress and high heels, using a vacuum cleaner to clean a dark-colored armchair. The vacuum cleaner is a 'Hooverette' style, with a long, flexible hose and a crevice tool attached. The woman is holding the handle of the vacuum, and the hose is extended to the chair.

for furnishings & stairs

Assemble double-stretch hose to front end of cleaner and fit the required accessory. The extension tube may be fitted to the hose to give extended reach.

blowing

To use the cleaner for blowing, fit the double-stretch hose and crevice tool to the rear end of the cleaner. To release any dust lying in the hose, switch on, with the hose directed outside the house.

carrying strap

When using the 'Hooverette' for cleaning furnishings and stairs etc. the special carrying strap supplied enables you to carry out your cleaning tasks with the weight taken off your hands. The strap can be adjusted to the most suitable length for carrying over your shoulder. To assemble squeeze the clips at each end of the strap and insert into the slots at each end of the handle.

the 'disposall' bag

Your 'Hooverette' is fitted with a special paper 'Disposall' Bag which should be emptied regularly and replaced when necessary to maintain cleaning efficiency.

to empty or replace the bag

To obtain access to the bag, rest the cleaner on its rear end, release the two side catches and lift off the front cover. The 'Disposall' Bag can then be removed and emptied. When refitting a bag, make sure that the paper is folded back over the edges of the cloth bag. Further supplies of 'Disposall' bags are available from your local Hoover dealer or Hoover Service Stations.

storing the cleaner

Store the flex around the body of the cleaner as shown in illustration. A hook is provided at the end of the handle grip section to enable the cleaner to be hung in a cupboard.

HOW TO MAINTAIN CLEANING EFFICIENCY

If the cleaner does not pick up satisfactorily, check these points before calling in a Hoover representative:

- 1) Does the 'Disposall' Bag need replacement or emptying?
- 2) Is the double-stretch hose or tube blocked? If so, they can be cleared by converting the cleaner as for blowing. Before switching on direct the hose, etc., outside the house.

SERVICE

The Hooverette Cleaner is made to high Hoover standards of efficiency and workmanship. It is guaranteed against mechanical or material defects for twelve months. When service is required you should write or telephone the nearest Hoover Service Station (see back cover) quoting the serial number on the cleaner, whereupon expert service will be given.
